WHY DO CLUBS?

Clubs allow you to spend time with students that you may not see in class, learning and experiencing things that you may not have done before. They can be very important at helping you to secure the job or school that you want as it shows that you can commit to doing something and trying hard to succeed.

My passion for rugby started at secondary school. I was encouraged by my friends and PE teacher to attend and have never looked back. It kept me active, taught me team working skills and made me friends for life. I still play rugby to this day

Mr Dakin.
