

### Curriculum Map- A Level Biology

Below is a curriculum map, showing what is taught at each stage of the year.

	Term 1.1	Term 1.2	Term 2.1	Term 2.2	Term 3.1	Term 3.2
Year 12 Teacher A	<b>Biological molecules</b> <ul style="list-style-type: none"> <li>Monomers and polymers</li> <li>Carbohydrates &amp; Lipids</li> <li>Proteins &amp; Enzymes</li> <li><b>Required Practical 1. Investigation into the effect of a named variable on the rate of an enzyme-controlled reaction</b></li> <li>Nucleic acids are important information-carrying molecules</li> <li>ATP, Water &amp; Inorganic ions</li> </ul>			<b>Exchange</b> <ul style="list-style-type: none"> <li>Surface area to volume ratio</li> <li>Gas exchange</li> <li>Digestion and absorption</li> <li>Mass transport</li> <li><b>Required Practical 4. Investigation into the effect of a named variable on the permeability of cell-surface membranes</b></li> <li><b>Required Practical 5. Dissection of animal or plant gas exchange or mass transport system or of organ within such a system</b></li> </ul>		
Year 12 Teacher B	<b>Cells</b> <ul style="list-style-type: none"> <li>Cell structure</li> <li>All cells arise from other cells</li> <li>Transport across cell membranes</li> <li>Cell recognition and the immune system</li> <li><b>Required Practical 2. Preparation of stained squashes of cells from plant root tips; set-up and use of an optical microscope to identify the stages of mitosis in these stained squashes and calculation of a mitotic index</b></li> <li><b>Required Practical 3. Production of a dilution series of a solute to produce a calibration curve with which to identify the water potential of plant tissue</b></li> </ul>			<b>Genetics</b> <ul style="list-style-type: none"> <li>Protein synthesis.</li> <li>Genetic diversity</li> <li>Adaptation</li> <li>Species and taxonomy.</li> <li>Biodiversity within a community</li> <li>Investigating diversity</li> <li><b>Required Practical 6. Use of aseptic techniques to investigate the effect of antimicrobial substances on microbial growth</b></li> </ul>		

**Year 13  
Teacher A**

**Bioenergetics**

- Photosynthesis
- **Required Practical 7. Use of chromatography to investigate the pigments isolated from leaves of different plants, eg leaves from shade-tolerant and shade-intolerant plants or leaves of different colours**
- **Required Practical 8. Investigation into the effect of a named factor on the rate of dehydrogenase activity in extracts of chloroplasts**
- Respiration
- **Required Practical 9. Investigation into the effect of a named variable on the rate of respiration of cultures of single-celled organisms**
- Energy and Ecosystems
- Nutrient cycles

**Organisms & their response to change**

- Survival & Response
- **Required Practical 10. Investigation into the effect of an environmental variable on the movement of an animal using either a choice chamber or maze**
- Nervous Control
- Homeostasis
- Blood sugar & water potential
- **Required Practical 11. Production of a dilution series of glucose solution and use of colorimetric techniques to produce a calibration curve with which to identify the concentration of glucose in an unknown 'urine' sample**

**Year 13  
Teacher B**

**Genetics, populations, evolution and ecosystems**

- Inheritance
- Populations
- Populations in ecosystems
- **Required Practical 12. Investigation into the effect of a named environmental factor on the distribution of a given species**

**Gene expression**

- DNA sequencing & protein structure.
- Gene expression
- Genome projects
- Gene technologies

### A Level Biology Assessment

Paper	Topics	Assessment Format	Question Style	
1	Any content from <b>topics 1–4</b> , including relevant practical skills	<ul style="list-style-type: none"><li>● written exam: 2 hours</li><li>● 91 marks</li><li>● 35% of A-level</li></ul>	<b>76 marks:</b> a mixture of short and long answer questions <b>15 marks:</b> extended response questions	
2	Any content from <b>topics 5–8</b> , including relevant practical skills	<ul style="list-style-type: none"><li>● written exam: 2 hours</li><li>● 91 marks</li><li>● 35% of A-level</li></ul>	<b>76 marks:</b> a mixture of short and long answer questions <b>15 marks:</b> comprehension question	
3	Any content from <b>topics 1–8</b> , including relevant practical skills	<ul style="list-style-type: none"><li>● written exam: 2 hours</li><li>● 78 marks</li><li>● 30% of A-level</li></ul>	<b>38 marks:</b> structured questions, including practical techniques <b>15 marks:</b> critical analysis of given experimental data <b>25 marks:</b> one essay from a choice of two titles
